# **Sarek\_Mic**

**Advanced Molecular Detection  
Southeast Region Bioinformatics**

**This resource was made possible through funding provided under the Epidemiology and Laboratory Capacity for Prevention and Control of Emerging Infectious Diseases (ELC) Cooperative Agreement (CK24-0002), Project D: Advanced Molecular Detection to the Florida Department of Health. The conclusions, findings, and opinions expressed by authors do not necessarily reflect the official position of the U.S. Department of Health and Human Services, the Public Health Service, or the Centers for Disease Control and Prevention.**

# Updates

- **Complete BRR Needs Assessment if you haven't yet – the more responses, the better!**
- **BRR/BTL Training - Delayed this year after changing from ABiL to UGA as our tutorial provider. Please update your ELC Milestones to notify them of this. We maintain contact with SaGE/OAMD team on these changes as well!**

# Overview

## Purpose

- Analyze microorganisms such as *Candida auris*, SARS-CoV-2, TB, and more with references which result in SNP calling and annotation that enhances for genomic research.

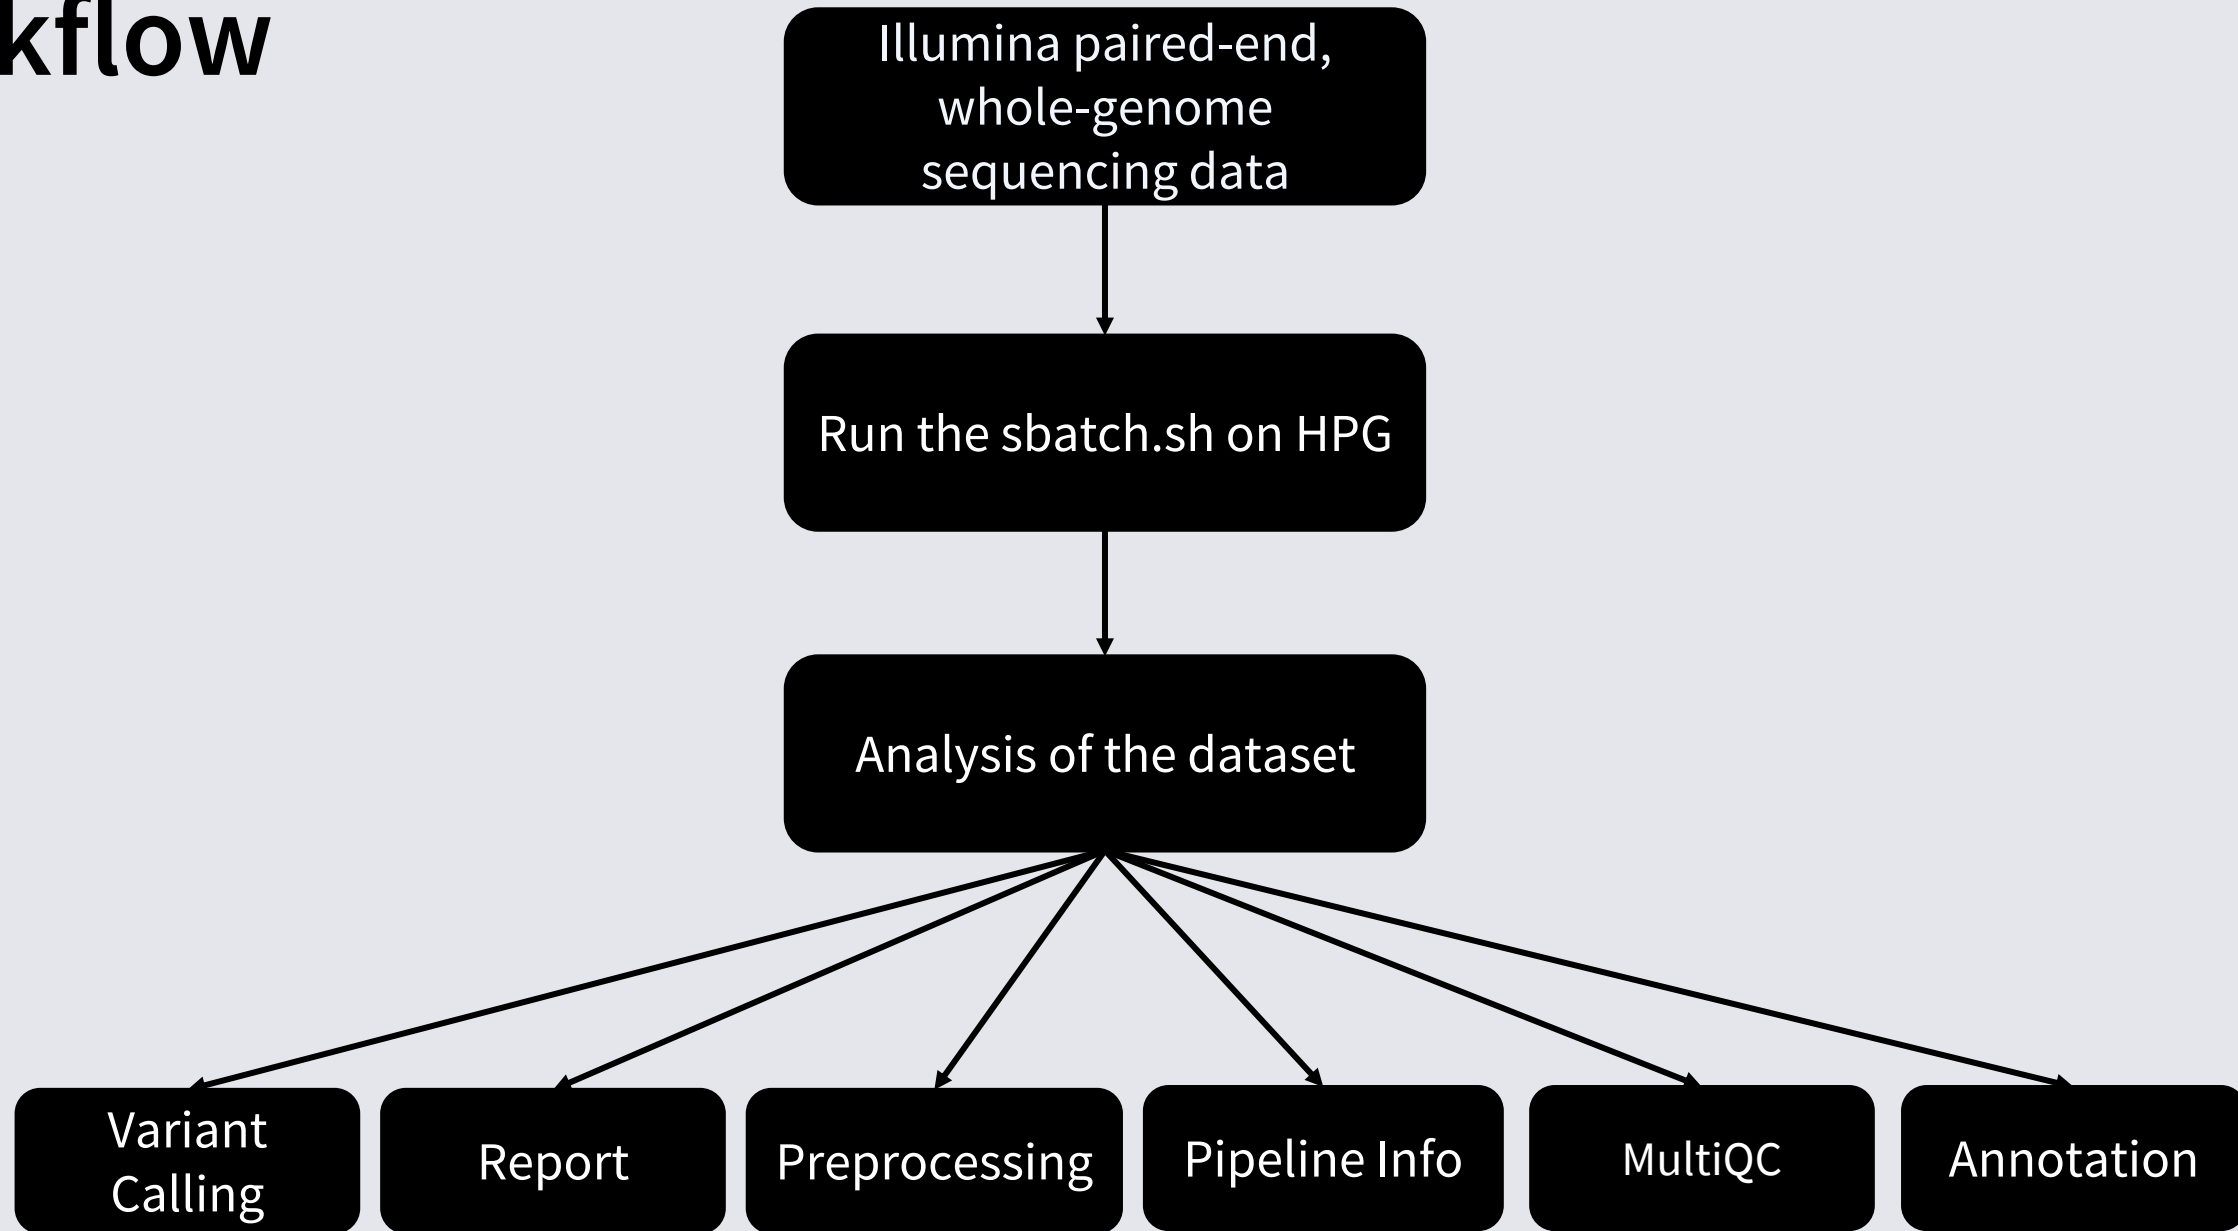

## Usage

- To support public health and researchers by providing detailed reports and analyses of the data which enables insights into drug resistance monitoring, genomic research, outbreak surveillance and epidemiological studies.

## Dependencies

- Nextflow
- nf-core

# Workflow

# Application

## Objective

Use SARS-CoV-19 dataset and analyze using Sarek-Mic Pipeline

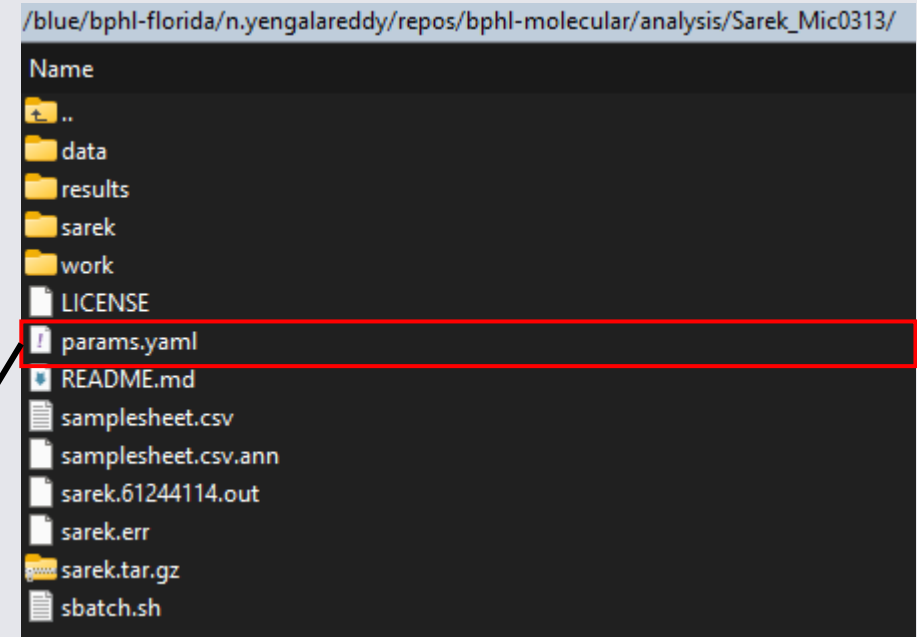

# Application Cont.

```
cd /blue/bphl-<state>/<user>/repos/bphl-molecular/  
git clone https://github.com/BPHL-Molecular/Sarek_Mic  
mkdir analysis/  
cd analysis/  
cp /blue/bphl-<state>/<user>/repos/bphl-molecular/ Sarek_Mic/  
copy .fastq to data directory
```

# Application Cont.

**nano** params.yaml

```
GNU nano 2.9.8 params.yaml

input: './samplesheet.csv'
outdir: './results/'
#genome: 'null'
tools: 'mpileup,haplotypcaller,freebayes,strelka,snpeff,vep'
skip_tools: 'baserecalibrator,baserecalibrator_report,dnascope_filter'
#step: 'annotate'
igenomes_ignore: 'true'
snpeff_cache: '/blue/bphl-florida/n.yengalareddy/repos/bphl-molecular/analysis/Sarek_Mic0313/data/snpeff_cache'
