

# mashwrapper

Advanced Molecular Detection

Southeast Region Bioinformatics

This resource was made possible through funding provided under the Epidemiology and Laboratory Capacity for Prevention and Control of Emerging Infectious Diseases (ELC) Cooperative Agreement (CK24-0002), Project D: Advanced Molecular Detection to the Florida Department of Health. The conclusions, findings, and opinions expressed by authors do not necessarily reflect the official position of the U.S. Department of Health and Human Services, the Public Health Service, or the Centers for Disease Control and Prevention.

# Overview

## Purpose

- This Nextflow pipeline uses Mash-based k-mer comparisons to rapidly screen sequencing reads against reference genomes to identify the most likely organism, such as SARS-CoV-2 and/or *Legionella*, from raw sequencing data.

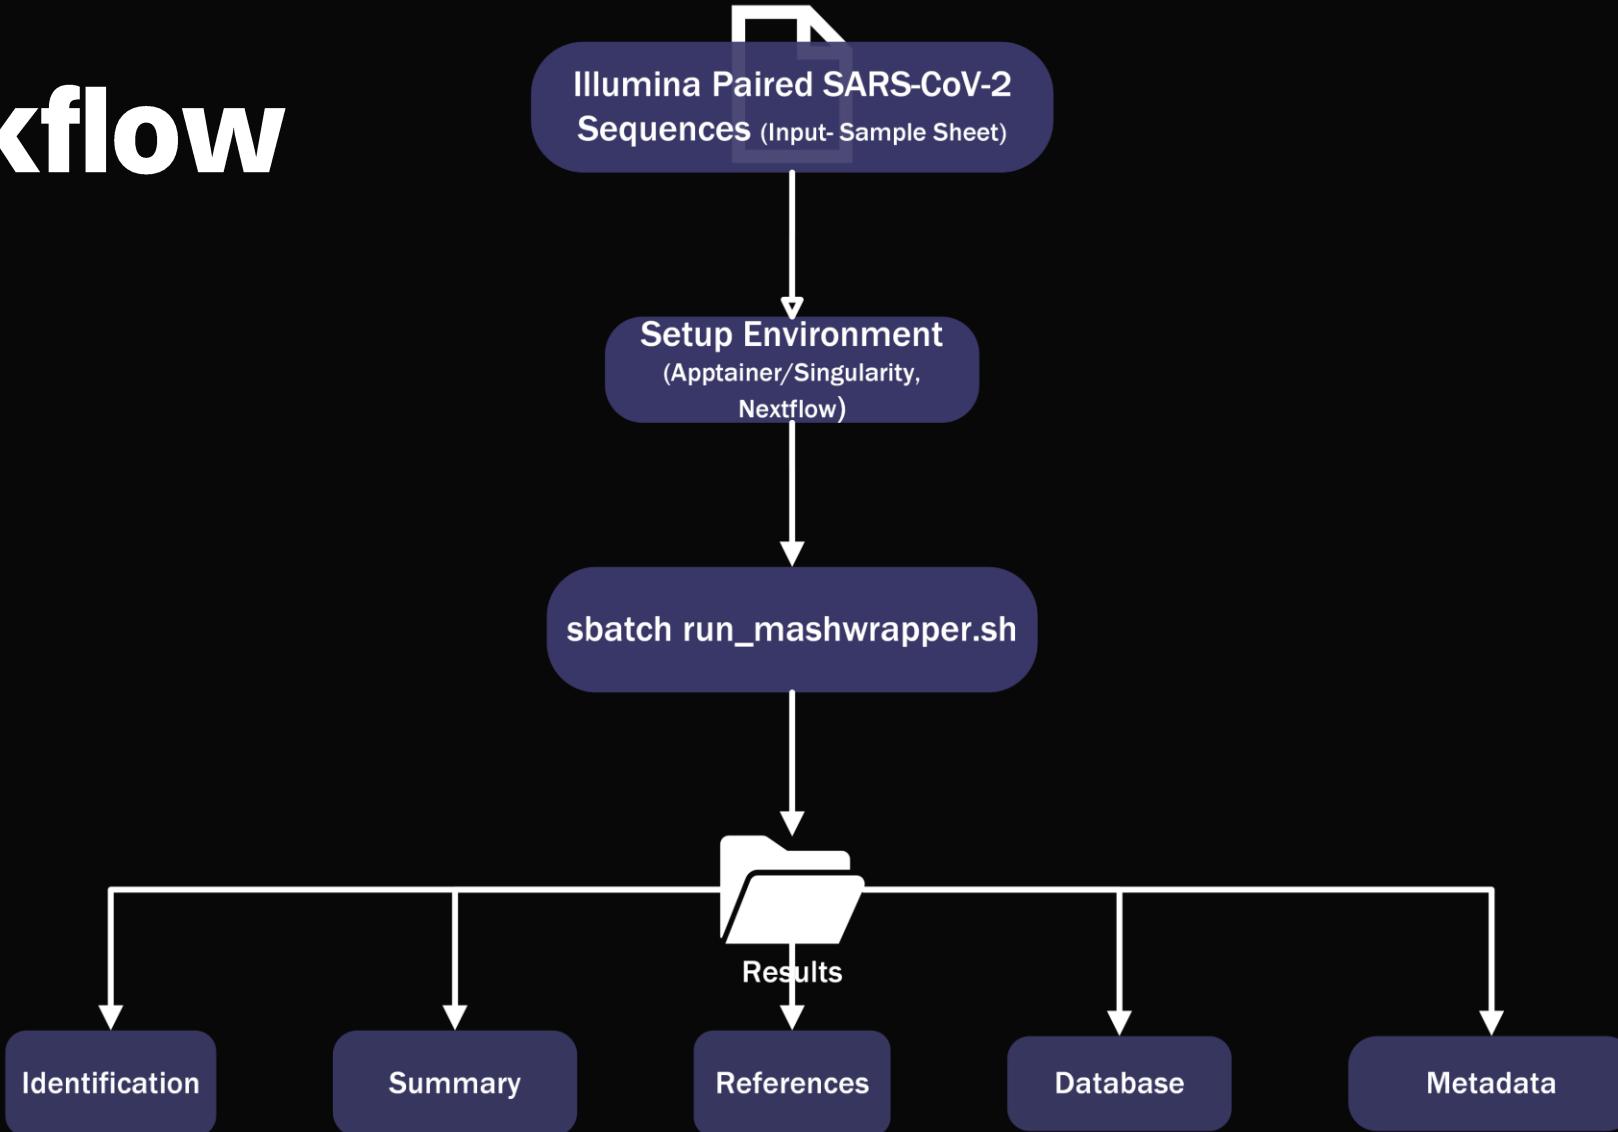

## Usage

- It enables public health laboratories to quickly confirm organism identity, validate sample content, and support downstream workflows such as lineage assignment, phylogenetic analysis, and genomic surveillance across multiple samples.

## Dependencies

- Nextflow and Apptainer/Singularity

# Workflow

# Application

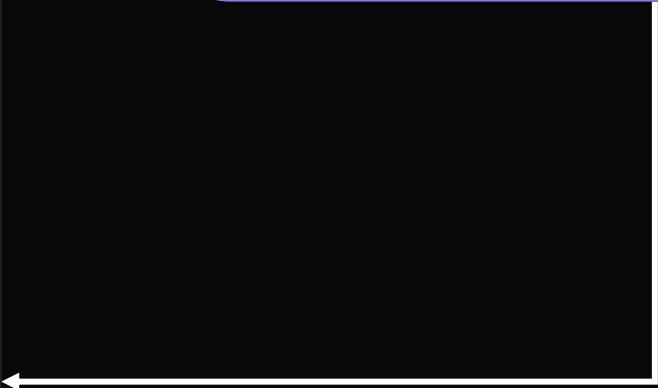

## Objective:

Use raw Illumina sequencing reads with mashwrapper to rapidly identify SARS-CoV-2 through k-mer-based comparison against reference genomes.

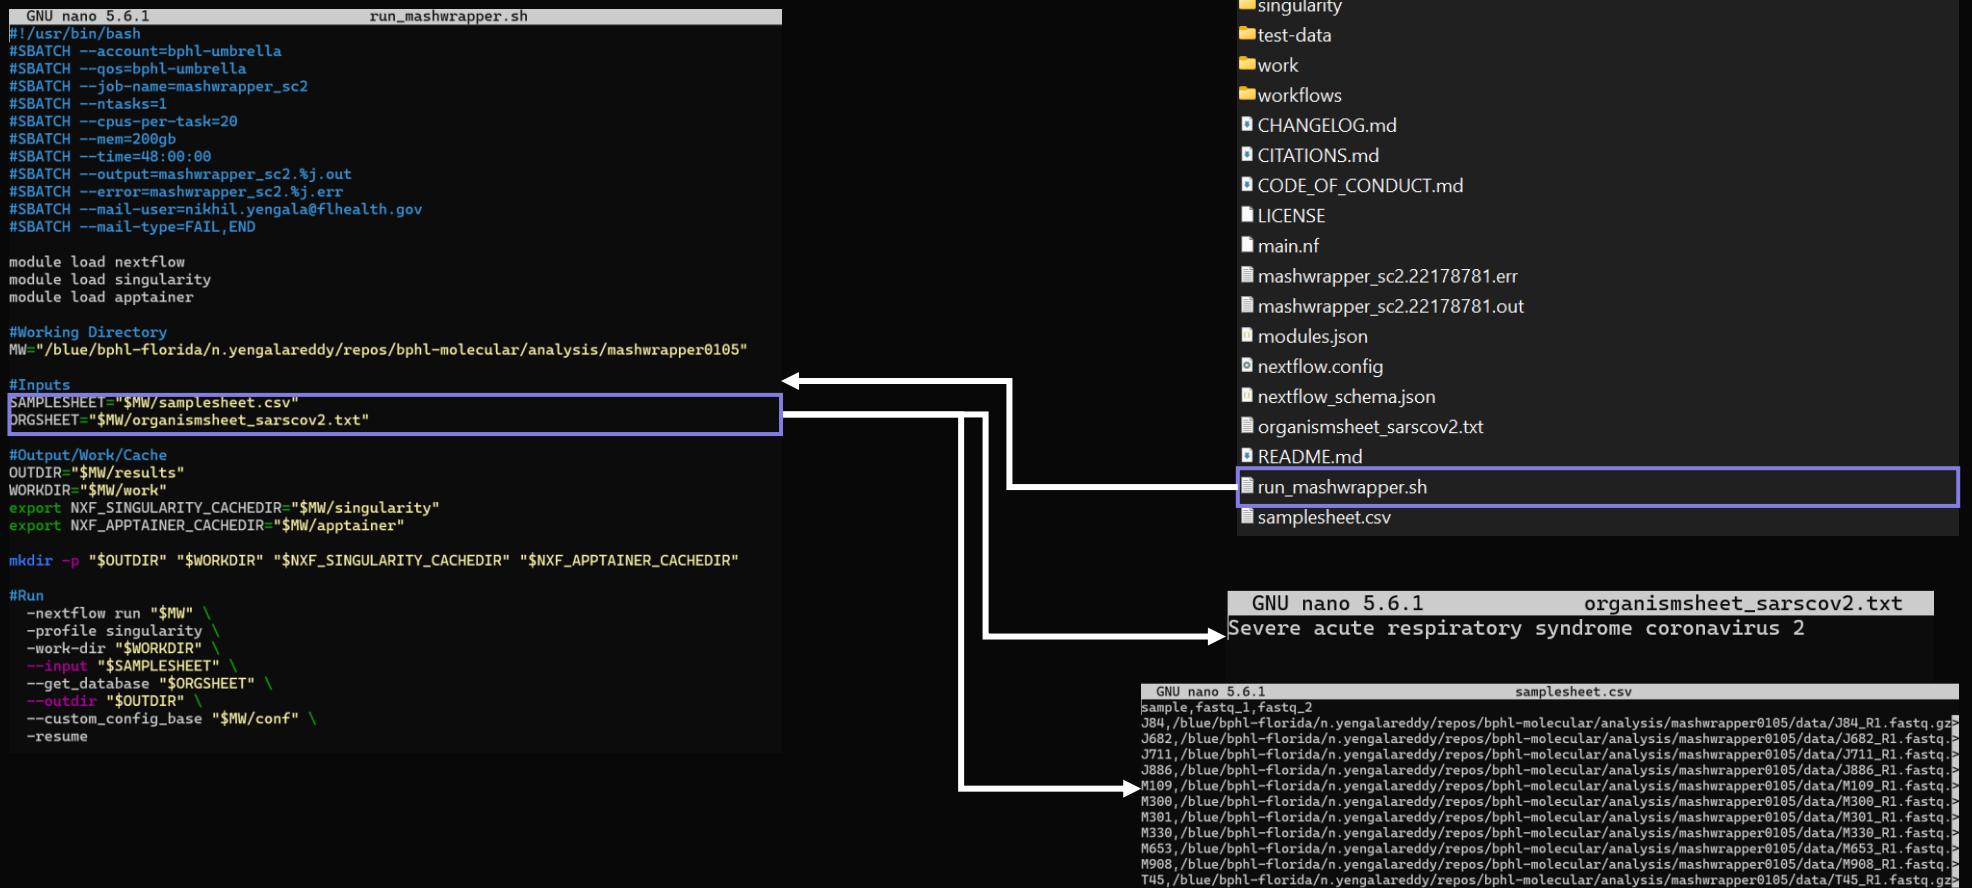

# Application Cont.

The screenshot shows a file explorer interface with two main windows. The top window displays a directory structure at the path: /blue/bphl-florida/n.yengalareddy/repos/bphl-molecular/analysis/mashwrapper0105/results/. The bottom window shows a detailed view of the 'mashFiles' folder at the path: /blue/bphl-florida/n.yengalareddy/repos/bphl-molecular/analysis/mashwrapper0105/results/mashFiles/. A blue box highlights the 'mashFiles' folder in the top window, and a white box highlights the same folder in the bottom window. Both windows show a list of files with names starting with 'Severe\_acute\_respiratory\_syndrome\_coronavirus\_2\_GCA...' followed by various identifiers and extensions (.fna.msh).
